

# Macintosh PowerBook 1400 Series Hard Drive Replacement

This guide will show how to replace the hard drive for the Macintosh PowerBook 1400c.

Written By: Jeffrey Huntley

## INTRODUCTION

This guide will show how to open up the PowerBook so that you may access the hard drive, and then show how to remove the hard drive.

---

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [Phillips #1 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Battery

- Turn the device upside down and then locate the battery latch near the front of the device.

## Step 2

- Slide the latch to the left to release the battery.

## Step 3

- Continue holding the latch then gently pull the battery out of the device.
- ⓘ Place the battery in a safe location.

## Step 4 — CD-ROM Drive

- Locate the CD-ROM Drive latch.

## Step 5

- Slide the latch to the right to release the CD ROM drive.

## Step 6

- Continue holding the latch then gently pull the CD-ROM Drive out of the device.
- ⓘ Place the CD ROM drive in a safe location.

## Step 7 — Keyboard

- Locate the speaker cover.

## Step 8

- Press firmly on each end of the speaker cover and slide it to the left.

## Step 9

- Gently lift the speaker cover to remove it.

## Step 10

- Lift the keyboard up from the back using a spudger(wedge side).

## Step 11

- Gently lift the keyboard until only the ribbon cable remains attached.

## Step 12

- Tilt the keyboard away from the screen.

## Step 13

- Locate the six screws that secure the heatsink.

## Step 14

- Remove the six screws from the heatsink using the Philips #1 screwdriver.

## Step 15

- Lift the heatsink from the side closest to the laptop screen.

## Step 16

- Remove the heatsink.

## Step 17

- Gently pull up on the beige ribbon lock until it moves a short distance on both sides to separate the ribbon cable from the connector.

## Step 18

- Detach the ribbon cable.

## Step 19

- Remove the keyboard.

## Step 20 — Hard Drive

- Locate and identify the two screws that attach the hard drive to the computer.

## Step 21

- Remove the screws with a Phillips #0 screwdriver.

## Step 22

- Once the screws are removed, lift up the end of the hard drive using your finger tips.

## Step 23

- Fully lift the hard drive vertically against the side of the computer.

## Step 24

- Push a finger down onto the plastic strap.

## Step 25

- Remove the hard drive from the computer by pushing down on the plastic strap and pulling up on the hard drive.

## Step 26

- The hard drive is now separated from the computer.

## Step 27

- Reverse these instructions to install a new hard drive, or to put the computer back together.

---

To reassemble your device, follow these instructions in reverse order.
